## Research Experience

---

**Undergraduate Thesis:** Empirical Evaluation of Pedestrian Behaviour at Bends and Junctions.

**Supervisor:** Dr. Moinul Hossain

**Description:** The aim of this research was to assess the impact of turning angle on microscopic and macroscopic pedestrian characteristics. In this study the effect of turning angle on the average speed and flow of pedestrians (i.e., solo and collectively) was also compared at various speeds (i.e., slow walking, fast pace and slow running).
